

Our commitment is a promise we fulfil every day: the promise to bring wonderful products to the table, which taste natural, delectable and amaze at first taste.

The wonders  
**OF NATURE**

We are a cooperative of member farmers. We grow vegetables **in a naturally sustainable way and deep-freeze them within hours of harvest**. We have been doing this for 50 years and over time, with passion and innovation, we have become **the leading Italian group in the production of deep-frozen vegetables**.

Thanks to the connections with our member farmers, **we have total control of the supply chain: from sowing to harvesting, from field to table**. We do everything by vocation. And we do it **in Italy**, our wonderful homeland: **we grow seasonal produce in the open field**.

When we start growing a vegetable, we first choose the **soils that are naturally best suited** for its development. This choice depends on different factors, such as the quality, the specific requirements and the characteristics of the soil, and the climate. The agronomists have the task to constantly monitor and analyse the selected areas.

Vegetable growing, harvesting, deep-freezing, storage, and packaging: we follow all the stages of the process. **Our goal is the best quality, always.**

# TAILOR-MADE OROGEL!

The right solution for every  
catering business.

## Traditional catering and restaurants

Ingredients available in every season, already cleaned, cut and ready to be cooked in a few minutes.

## Delicatessens

Delicatessens are true showcases of taste, which is why they must offer inviting recipes and fresh products every day.

## Collective and company catering

Plenty of proposals for tasty and balanced menus: anti-waste, dosable, and immediately ready.

## Pizza making

The product range includes plain and grilled vegetables. Orogel deep-frozen vegetables are true allies of pizza makers.

## Arte Bianca - Bakery and patisserie

Bakers and pastry makers will find all the ingredients they need in the Orogel product range to please anyone's taste buds

## Quick catering

Burgers and flans are just a few of the proposals for quick catering where convenience, service and taste are the ace cards!

## Banqueting

Refreshments, company lunches and dinners, buffets, cocktails, parties: Orogel products are the quick and tasty solution.

# FOR THE FOOD SERVICE PROFESSIONALS

We are at the side of professionals to help them win with the challenges of every day, offering a product that is good, fresh, and always ready. Quality products, tailor-made solutions, innovative recipes and the latest trends in food service to be always up to date.

## PRIVATE LABEL

Tailor-made products to meet every need.

Thanks to our extremely flexible production lines, we can manufacture products according to specific customer requests, and following all the agreed procedures: from the original idea, through laboratory testing to the industrial prototype and actual production.

## PACK

The best packaging for every channel.

| FSC cardboard box

| Resealable package with dosing cap

| Low-thickness polypropylene bags  
| Pillow bags

| Compostable material  
| Microwavable packs

| From single servings to industrial size

## FOR RETAILERS

A very wide range of products, with vegetables harvested fresh and immediately deep-frozen, to offer a highly serviceable product, which is also delicious and ready to use.

From plain vegetables to vegetable purées, soups and minestrone, side dishes and ready meals.

## FOR INDUSTRY AND LABORATORIES

**We are a partner supplier offering very high-quality and extremely competitive products and services**, such as grilled vegetables, battered products, herbs and seasonings or semi-dried produce.

## QUALITY CERTIFICATIONS

Safety and quality are our primary goals, which is why we have achieved important **national and international quality certifications.**

The profound attention to every detail is guaranteed by product and service certifications that attest to our commitment to carefully checking the production chain and the absence of GMOs.
